

K-Love Radio (local San Antonio at FM91.3 is the only station supporting my faith that plays Contemporary Christian music and is involved in local ministry. This station is much more necessary than a LPFM (Low Power FM) station. Please do not displace it. More than 60% of the population of the United States is Christian. This is a very important source for Christians, especially in the younger generations. San Antonio is comprised of well over 60% Christians. We need this station in our community.

Thanks,

David Markell
